Questions used for Survey

- What is your Name?
- What is your age group?
 - under 18
 - 18-24
 - 25-34
 - 35-44
 - 45+
- What is your gender?
 - Male
 - Female
 - Non-Binary
 - Prefer not to say
- How often do you travel alone?
 - Frequently (More than 5 times a year)
 - Occasionally (2-4 times a year)
 - Rarely (Once a year or less)
 - I have never traveled solo (but wish to)
 - I don't want to travel solo
- What are your primary reasons for solo travel? (Select all that apply)
 - Leisure/vacation
 - Business/work
 - Education
 - Backpacking/adventure
 - Personal exploration & growth
 - Other:
- Which types of destinations do you usually visit?
 - Which types of destinations do you usually visit? *
 - Urban cities
 - Rural or remote areas
 - International travel
 - Domestic travel
 - Mixed (Urban and remote both)
- What does the word 'safe' mean to you when you are travelling solo or in a group too?
- Have you ever felt unsafe while traveling alone?
 - Yes, many times
 - Occasionally
 - Rarely

- No
- What safety concerns do you face while traveling alone? (Select all that apply)
 - Fear of physical assault/harassment
 - Theft, scams, or fraud
 - Unsafe public transport or taxis
 - Difficulty accessing emergency services
 - Unverified accommodation safety
 - Feeling lost or disoriented in new locations
 - Digital safety (cyber harassment, privacy issues)
 - Other:
- What safety measures do you currently take while traveling solo? (Select all that apply)
 - Sharing live location with family/friends
 - Using safety apps or emergency contacts
 - Choosing accommodations based on safety ratings
 - Avoiding certain areas at night
 - Taking self-defense training
 - Other:
- Do you currently use any digital safety tools while traveling?
 - Yes, regularly
 - Occasionally
 - Rarely
 - No
- What features do you find most useful in a travel safety app?
 - Real-time location sharing with emergency contacts
 - AI-based route planning to avoid unsafe areas
 - SOS button for emergency assistance
 - Crowdsourced safety ratings of locations
 - Verified local female guides or buddy system
 - Digital privacy protection (blocking trackers, secure logins)
 - Other:
- How important is community support for your solo travel safety? *
 - Extremely important
 - Somewhat important
 - neutral
 - Not very important
 - Not important at all
- Would you trust real-time, user-generated safety ratings for locations?
 - Yes
 - No
 - Maybe
- Would you use a platform that connects solo travelers with verified local guides or buddy travelers?
 - Yes
 - No, i'd rather travel alone
 - Maybe, depending on how it's verified

- What features would you like to see in an ideal travel safety platform?
 - AI-powered safety alerts & smart navigation
 - One-touch emergency SOS feature
 - Anonymous reporting of incidents and unsafe areas
 - Verified community reviews on accommodations and transport
 - Real-time crowdsourced location safety ratings
 - Integration with emergency services (local police, embassies)
 - Other:
- How would you prefer to receive safety alerts while traveling?
 - SMS alerts
 - Push notifications on mobile
 - Email alerts
 - in-app pop ups
 - Other:
- Would you be willing to pay for a premium version of a travel safety app with advanced security features?
 - Yes
 - No
 - Maybe
- What improvements do you think should be made in existing travel safety solutions?

User Profile Canvas

- **User Profile 1: “Minimalist, Budget Conscious”**
 - **Feature Preference:** One-touch SOS, or possibly none.
 - **Alert Preference:** Just SMS or minimal notifications.
 - **Willingness to Pay:** No.
 - **Improvements:** Emphasis on emergency calls or official integration but not interested in AI Driven solutions
 - **Pains**
 - Fear of unable to contact during emergency
 - Doesn't rely on high tech solutions
 - May not trust digital safety tools due to lack of awareness
 - **Gains**
 - Simple One – Touch SOS Button for Emergency assistance
 - Real time location sharing only
 - Prefers direct human support and not AI based.
- **User Profile 2: “Tech Enthusiast, Full Feature”**
 - **Feature Preference:** AI-driven solutions, multiple integrated features.
 - **Preference:** Push notifications.
 - **Willingness to Pay:** Yes or Maybe.
 - **Improvements:** More advanced, AI powered, better connectivity, real-time incident reports and wants route safety
 - **Pains**
 - Needs digital security to avoid cyber harassment or location tracking.
 - Worries about digital safety (cyber harassment, privacy issues, tracking)
 - Wants smarter navigation to avoid high risk areas.
 - **Gains**
 - AI-powered route planning to avoid dangerous areas.
 - Automatic SOS alerts when entering high-risk zones.
 - Instant push notifications, SMS, and in app alerts during security risks.
- **User Profile 3: “Community & Information Driver”**
 - **Feature Preference:** Anonymous reporting, verified community reviews, real-time safety data.
 - **Alert Preference:** Typically push or in-app notifications.
 - **Willingness to Pay:** Some say maybe, some say no.
 - **Improvements:** More user-friendly community-based solutions, easy access to local info.
 - **Pains**
 - Feels **vulnerable** in unfamiliar locations without local insights.
 - Concerns about scams, theft, and dishonest guides.
 - Struggles with outdated or generic safety data—wants real-time community-verified updates.

- **Gains**
 - Wants police-verified stays & trusted local connections.
 - User-generated safety alerts based on current events.
- **User Profile 4: “Cautious, Policing/Authority Integration”**
 - **Feature Preference:** One-touch SOS plus direct link to authorities.
 - **Alert Preference:** Possibly SMS or push notifications.
 - **Willingness to Pay:** Could be mixed.
 - **Improvements:** Prefers government-verified solutions over AI or crowdsourced data.
 - **Pains**
 - Worried about inaccessible or slow emergency response.
 - Safety tools lack real-time police coordination.
 - **Gains**
 - Police-verified accommodations & taxi services.
 - Direct emergency contact button for instant police response.
 - SMS alerts from authorities when entering high-risk zones.

User Pains (Challenges & Concerns)

1. Safety Concerns

- Fear of physical assault/harassment, especially for solo female travelers.
- Concerns about theft, scams, fraud, and unsafe public transport/taxis.
- Worries about digital safety (cyber harassment, privacy issues, tracking).
- Difficulty in accessing emergency services or lack of verified accommodation safety.

2. Lack of Reliable Information

- Existing travel safety solutions are generic, not location-specific.
- Limited real-time, crowdsourced safety ratings of locations.
- Difficulty in knowing shady or high-risk areas before traveling.

3. Social & Psychological Factors

- Some travelers feel disoriented or lost in unfamiliar locations.
- Feeling vulnerable when alone at night or in poorly lit areas.
- The need for trusted local connections to feel more secure.

4. Limitations of Current Safety Measures

- Many travelers rely on self-imposed safety measures (avoiding areas at night, sharing location with family).
- Limited adoption of digital safety tools; many don't use them or find them ineffective.
- Lack of real-time police/emergency response integration.

User Gains (Needs & Expectations)

1. Enhanced Digital Safety Solutions

- Real-time location sharing with emergency contacts.
- AI-powered route planning to avoid unsafe areas.
- One-touch SOS buttons for emergency assistance.
- Verified local female guides or buddy systems for safer exploration.

2. Community & Crowd-Sourced Safety Features

- Crowdsourced safety ratings of locations, accommodations, and transport.
- Anonymous reporting of unsafe incidents for real-time updates.
- Integration with emergency services (police, embassies, hospitals).

3. Stronger Support Systems

- Travelers value community support, especially women and first-time solo travelers.
- Police verification of accommodations and local contacts to build trust.
- A desire for location-specific solutions rather than one-size-fits-all apps.

4. Proactive Safety Alerts & Notifications

- Push notifications, SMS alerts, and in-app pop-ups for safety warnings.
- Automatic alerts when a driver takes a wrong route or enters a high-risk zone.
- Integration with public transport for better last-mile safety, like women-only buses at night.

Insights & Observations

- Women's safety is a major concern, with harassment and physical security being top fears.
- Men are more concerned about theft and scams, while women focus on personal safety and digital threats.
- Community verification and local support systems are highly valued, but some still prefer solo travel.
- Many travelers are not using safety apps regularly, either due to lack of awareness or trust in existing solutions.
- AI and automation are seen as helpful, but users also want human support and verification for trust.
- Real-time, location-specific safety information is missing in most solutions, making it a key improvement area.
